

# Case Study

*Radius Systems Ltd  
Islam and it's People Course*

“My team attended a full day training session regarding Islam and the principal tenets of its culture.

The day was full of interactive events, which made it stimulating and educational. By participating in the activities, we assimilated much information which was done much more easily than had we been sitting in a classroom with colleagues taking notes.

We covered a number of areas, (including clothing, food and washing), and now I feel more knowledgeable about the culture when I am visiting that part of the world.

I have visited the Middle East regularly over the last 25 years or so, but despite my frequent trips to the region, I picked up a wealth of information about the culture, which I put to good use in my professional and social contacts with people from that part of the world. Attending this course has enabled me to improve my understanding of the culture of Islam and so I would recommend this course to anyone who is likely to spend time in that part of the world, whether for business or leisure reasons.”
